Our furniture, Your story.

MARCUS COLLECTION

Our beautiful world is evolving, and with it, so are we. In the fluidity of life, we are becoming more aware of the amazing opportunities we have, the choices we make, and the footprint we leave behind.

Like the nature that surrounds us we are finding new, exciting ways to grow, to soften the fixed structures that restrain us, to liberate our creativity and to view our life, our work and our world with new eyes.

All our customers, down to the enduser, are our partners. We always focus on this. We try to make our consumer happy from its design, practical structure and ergonomics. With our style that does not get stuck in any trend, we produce products that can adapt to every age and culture, and to different parts of the world. By keeping our production sites up to date, we produce our designs using the most advanced technology of the time.

Esthetics and precision pioneers of this unique design.

Design thinking

Our brand is going through an important meticulous process. Gk Mobilia claims to meticulousness and perfection in its production philosophy, because the growing understanding in today's information technology age is solution, truth and transparency. Therefore, we adopt these concepts as a reality, not a trend.

Our design principles

Every brilliant idea, timeless design, and inspirational home is born from a beautiful and creative mind, reflecting identity, values, and aspirations. Just as a home can evoke warmth and comfort, it also nurtures creativity, harmony, and safety.

New Turkish design

From our very first concept sketches, we adhere to six simple, yet powerful principles. Repair, Reduce, Rethink, Recycle, Refuse and Reuse. The 6 Rs are an essential ingredient in our design brief and in the creation of beautifully long-lasting designs, developed with a more durable product life cycle.

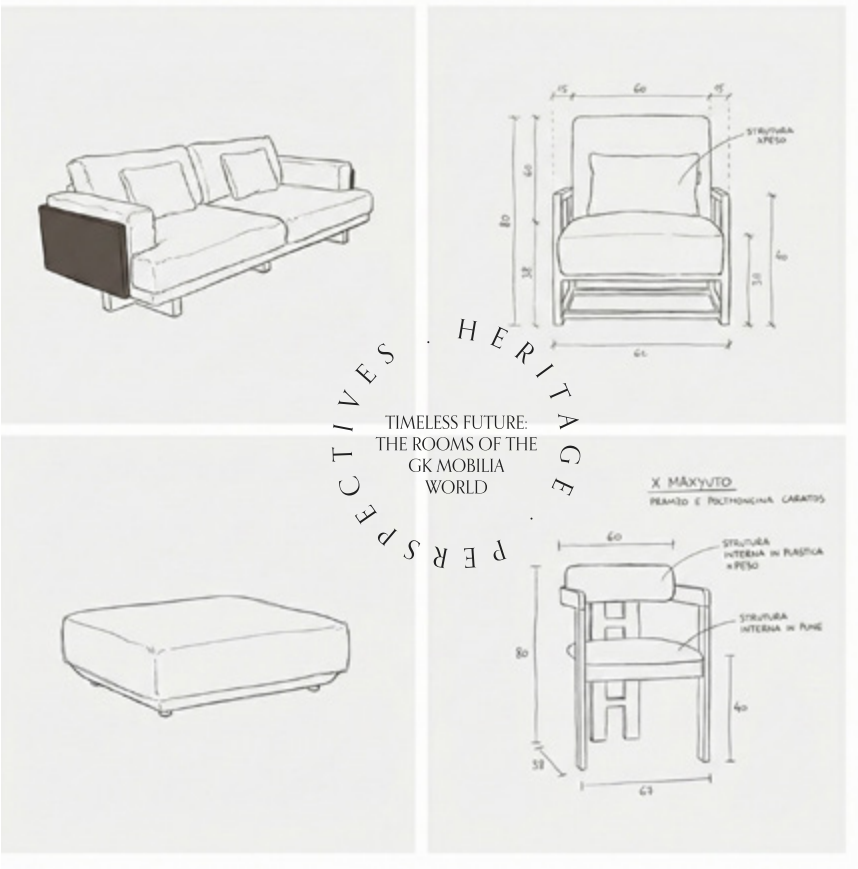

A responsible foundation

We are committed to making beautiful design through ethical practices and high standards of quality, worker safety, and environmental considerations, and continually work to improve our value chain. We're on a mission to minimise waste, rethink packaging, and ensure our designs are repairable and recyclable. Introducing changeable covers to extend the lifetime of our sofas is just one way of doing it.

Made to last

For us, great design is not only what meets the eye, but just as importantly, how it is created – and the way it makes us feel. From the first sketches to the final product, every design is made to last. Crafted from the finest and most durable materials. All designed to create calm, luxurious, and beautiful spaces. For decades of life and for generations to come.

Innovation and tradition

We are committed to making beautiful design through ethical practices and high standards of quality, worker safety, and environmental considerations, and continually work to improve our value chain. We're on a mission to minimise waste, rethink packaging, and ensure our designs are repairable and recyclable. Introducing changeable covers to extend the lifetime of our sofas is just one way of doing it.
